AVAILABILITY

Key models and tools are connected required datasets.

1

QUALITY

Detailed documentation on all models, tools, and data are available.

4

FASTER

All models and tools are ready to use.

2

Framework Benefits

5

IMPROVEMENT

Uncertainty evaluation on weather patterns and model performances.

PRECISE

All models and tools have been evaluated and verified.

3

CUSTOM-BUILT

Customize pest forecasts for pests and locations on websites.

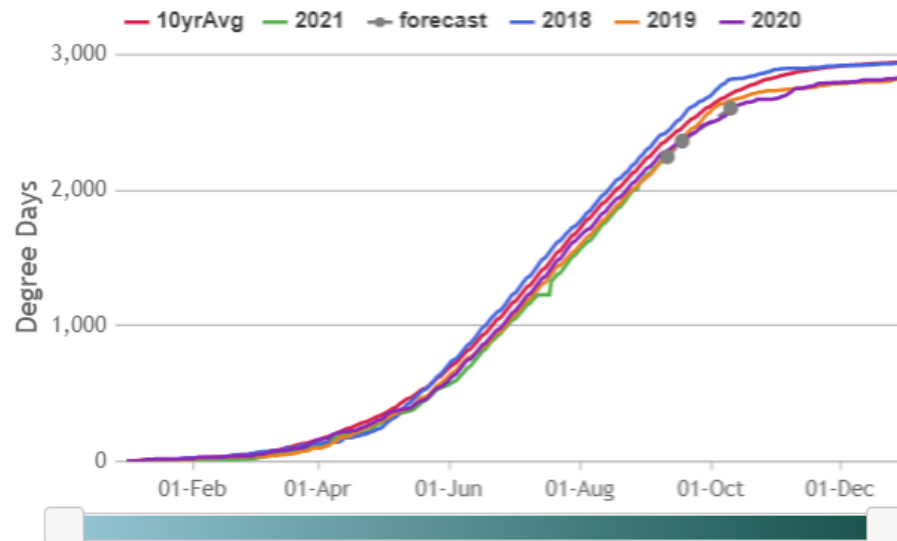

6

Pest Name Spotted lanternfly

[FCM Methodology Document](#)

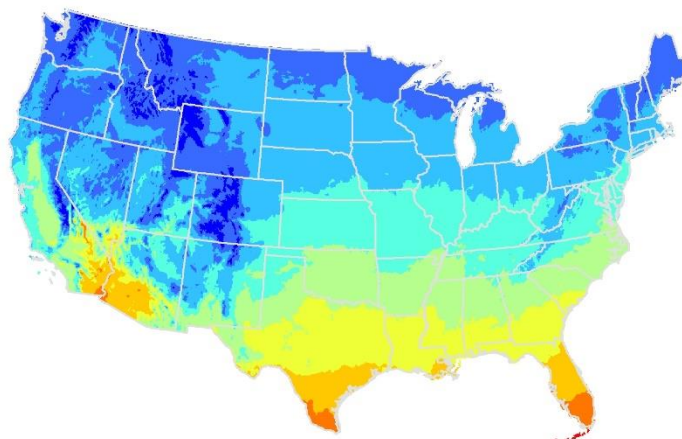

Long-term Forecasts: Oriental Fruit Fly

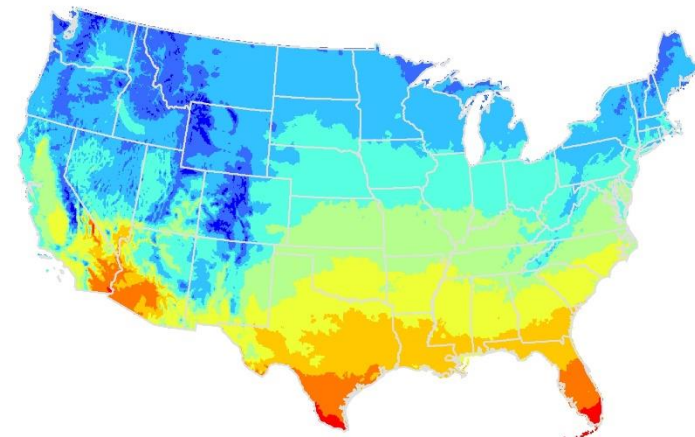

- Understand climate change effects on plant pest growth
- Southern US is expected to have 2-3 more generations in the future

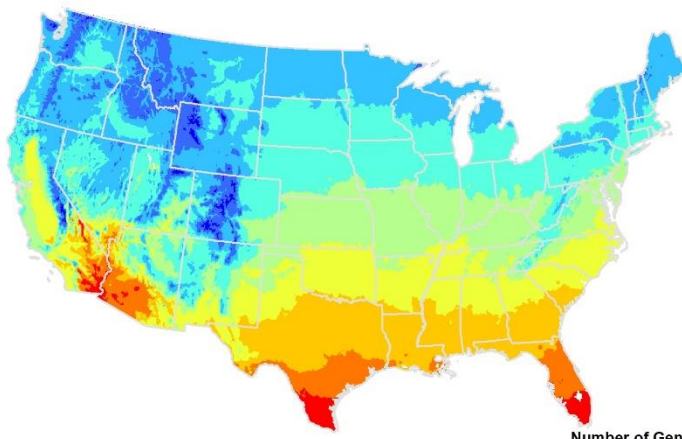

A: Historical (1998-2017)

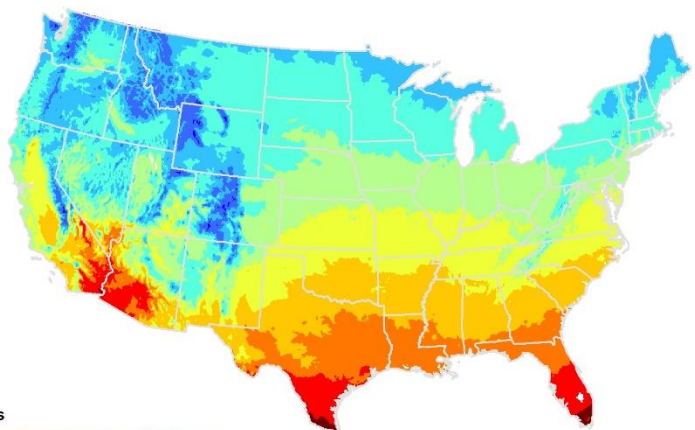

B: 2021-2040

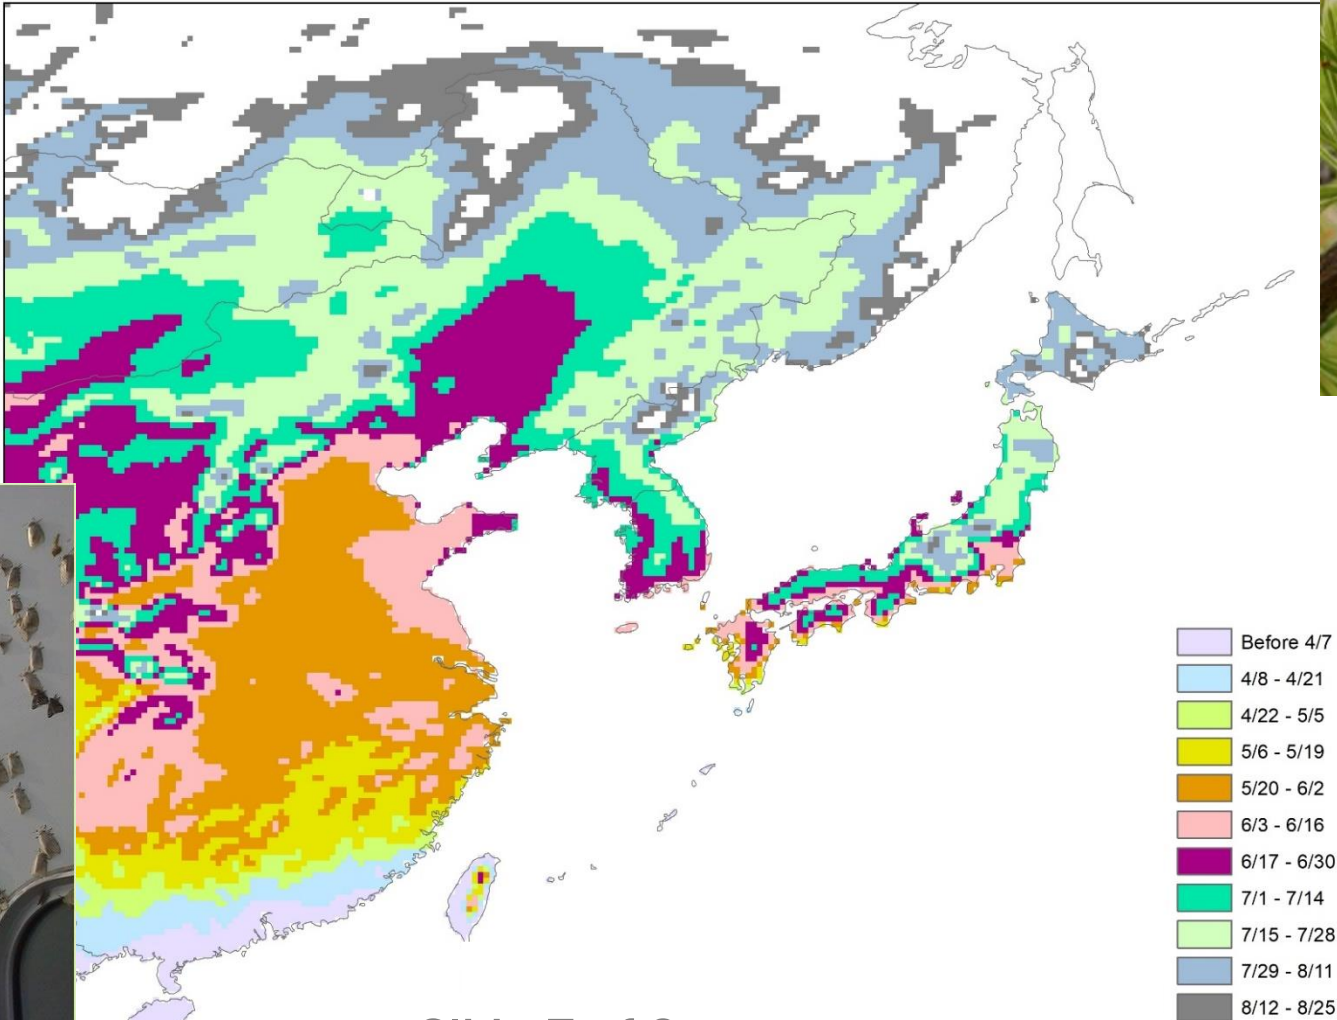

C: 2041-2060

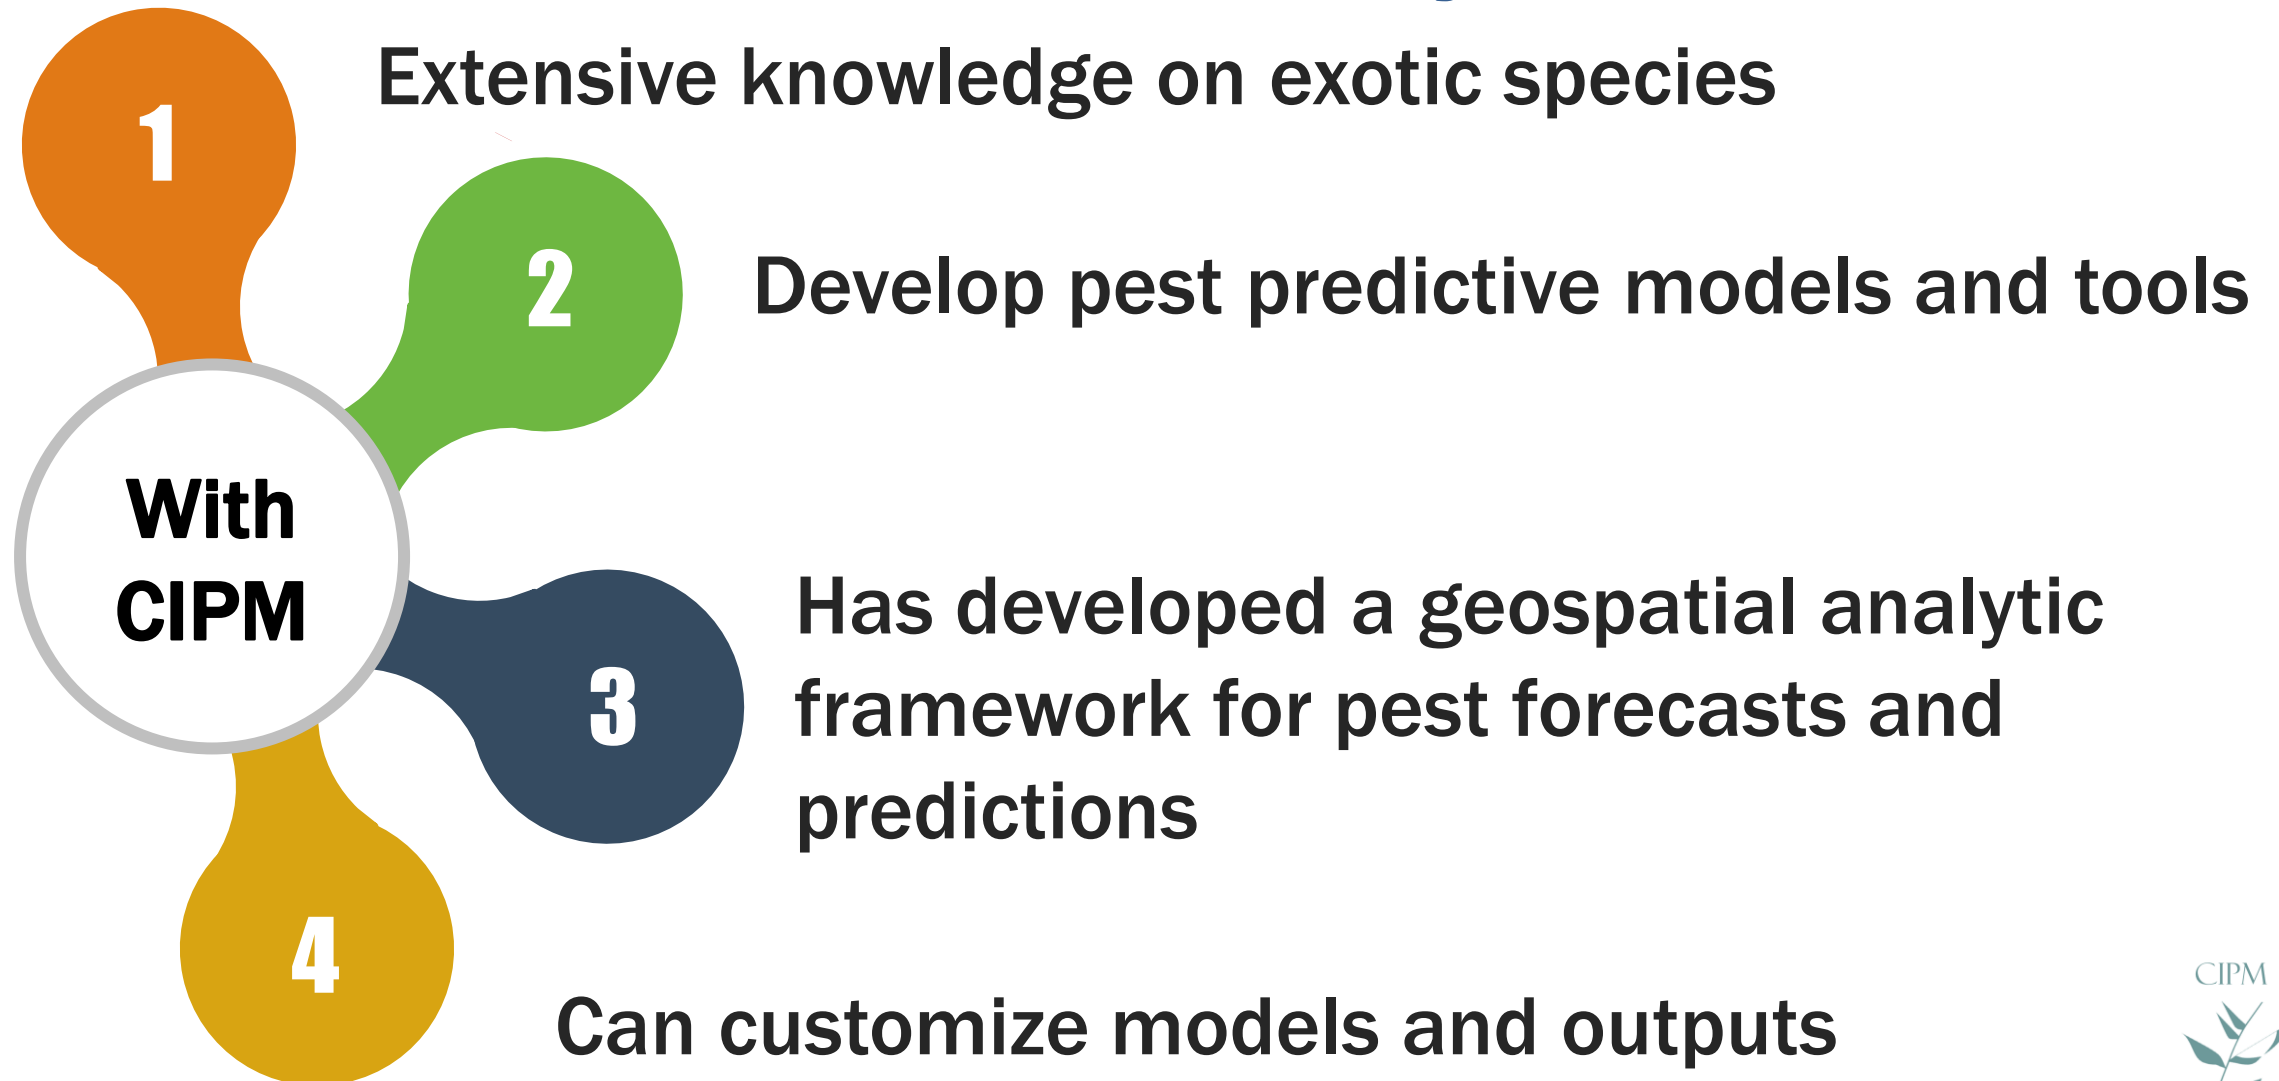

D: 2061-2080

Spatial Analytic Framework

Feedback from You

Understanding Your Needs

- We can provide plant pest analytic information

Sustainable Agriculture

- We can assist designing sustainable agriculture using scientific methods and leading-edge technology

Benefits

- Beneficial for area-wide pest mgt.
- Identify long-term benefits
- Support UN's 17 Sustainable Dev. Goals
